

“Test Drive” Fastenal’s FAST 5000SM Vending Machine

Indiana Government Center, March 15th from 9:00 am to 2:00 pm

FAST 5000SM

Real Customers. Real Results.

It’s not just a machine; it’s a full-service inventory control solution that’s helping customers save money and preserve jobs.

- Eliminates the need to stockpile inventory, and the fear of running out
- Improves productivity by providing 24/7 inventory at the point of use
- Automates ordering – when stock runs low, an order is automatically sent to your local Fastenal store, eliminating stock-outs and PO’s
- Allows you to track each transaction by individual, group, job, cost center, and other meaningful criteria

Announcement

The State of Indiana has recently amended QPA 11179 to include Fastenal Automated Supply Technologies (FAST). The amendment enables State Agencies, Political Subdivisions, and Schools to place Fastenal’s FAST 5000 industrial vending machines on site with a simple order form.

How Can the FAST 5000 Impact Your Operation?

The FAST 5000 program puts QPA items/Fastenal inventory on site and makes them available 24/7. The machines empower the storeroom keeper by freeing up time traditionally spent sourcing, quoting, and dispensing common items. For the maintenance technician or engineer, the FAST 5000 makes product readily available for their use. No more waiting in line at the stock room, waiting on a delivery, response time or quotation before an order can be placed.

The machines also offer a number of efficiencies for procurement administrators. Inventory risks are reduced because the inventory does not become property of State agencies until they are dispensed. QPA items dispensed from the machines are posted to the Punch Out catalog in a quote. No more waiting on quotes, vendor responses, lead times, or delivery dates; and most importantly, no more waiting on critical-need items.

Coming to a Site Near You!

Fastenal has deployed a fleet of sprinter vans complete with operational FAST equipment and reporting capabilities. The vans present the opportunity for Fastenal to bring this technology to the customer for a hands-on “test drive.” Users and buyers alike will benefit from learning more about the machines.

Please join us from 9 am to 2 pm on March 15th at the Indiana Government Center - Robert D. Orr Plaza. Demonstration of the vending machines will be performed inside Fastenal’s sprinter van parked on the plaza.
